## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Hitomi et al. Note Figure 6 showing a first EGR passage with a first EGR valve (22) and a second EGR passage with a second EGR valve (24) and an EGR cooler (25).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

Art Unit: 3747

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 25, 30-32 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sumser et al in view of Hitomi et al. Sumser et al discloses the claimed invention in Figure 1 with EGR passage (26) and control valves (31) and (32); however a cooler to cool the EGR is not disclosed. Hitomi et al teaches that it is known to provide an EGR cooler (25) for cooling the exhaust gas before mixing with intake air before the compressor as shown in Figure 6. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the EGR system of Sumser et al by providing an EGR cooler as taught by Hitomi et al in order to maintain a reduced temperature of the intake air before being compressed.

### ***Allowable Subject Matter***

Claims 2-8, 11, 26-29 and 33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 12-24 are allowed.

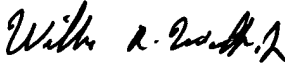

***Response to Arguments***

Applicant's arguments with respect to claims 1, 9, 10, 25, 30-32 and 34 have been considered but are moot in view of the new ground(s) of rejection.
